

# The P-Tn ProgressWEBCAM

P-Tn's ARCHIVEpics Interface online access control panel

VISUAL DOCUMENTATION  
photo - digital - video

P-Tn installed its first internet construction web cam in 1999! they may now be the system of choice for site monitoring... as we host cameras throughout Kansas City & the midwest.

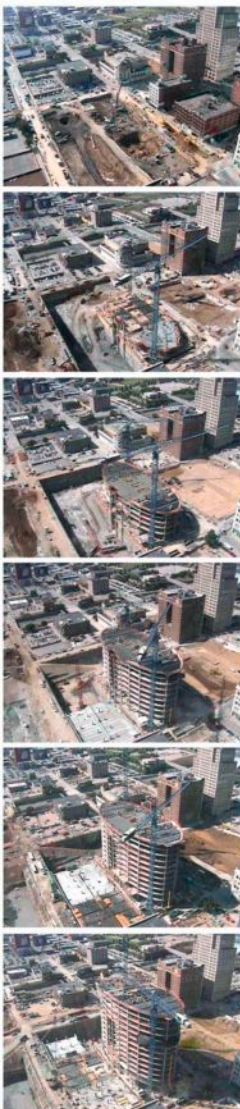

Let's cut to the chase on price and service. Every construction site is unique in layout and accessibility; no two ProgressWEBCAM installations are alike. Our staff provides all logistical support for planning, installation, hosting & maintenance, plus removal of your WEBCAM system, everything from wired & wireless fixed-lens or Pan-Tilt-Zoom units, plus rooftop and other mounting systems, as well as installation of jobsite portable towers and solar / battery power options.

We sell and lease our systems, with basic installations from \$3500, plus monthly hosting at \$465. Our Portable INDOOR handtruck can be on-site and operational in a day or two, for about \$1350, plus hosting! P-Tn's camera tower or solar power options may eliminate the need for pole & electrical installations. Please CALL US to discuss your particular project's needs; we'll give you numbers, and answers.

In response to client request, we have introduced our SecurityCAM package, developed specifically for active construction sites, providing improved protection for your job site office trailer and adjacent lay-down & material storage areas. Installation starts at \$3850 for purchase, or under \$2500 on lease, plus monthly operation fees of \$135-225; periodic equipment checks are available at \$120/month.

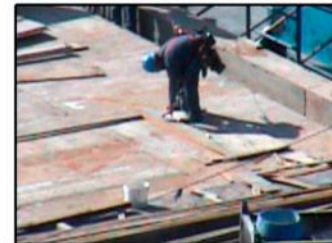

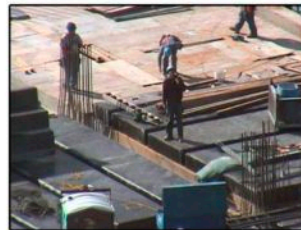

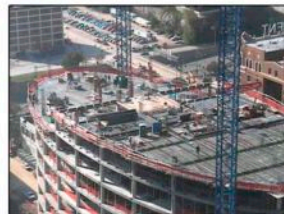

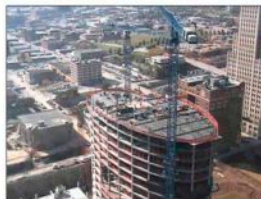

P-Tn also offers traditional ground and aerial-based construction progress photography documentation, and these P-Tn ProgressPHOTOS can be delivered as DIGITAL image files on CD-ROM & print, or posted to a 'private' PROJECT WebGALLERY - convenient internet access to the entire project team.

Visit us at [P-Tn.com](http://P-Tn.com), to learn more about our 'Visual Documentation' services!

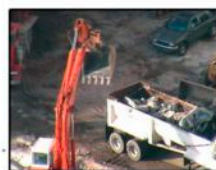

P-Tn ProgressWEBCAM hosting is centered around our unique P-Tn ARCHIVEpics Interface.

- FUNCTIONALITY INCLUDES:
- latest image display
  - image magnification tool
  - calendar archive to all images
  - current site weather conditions
  - interactive map to project site
  - email with image attached
  - link to all ProgressWEBCAMS on the same project
  - time-lapse picsSLIDESHOW
  - link to WebWINDOW including quarterly edited time-lapse ProgressCAMovie
  - password-protected access to ProgressWEBCAM Live View (w/PTZ control, if available)
